Lots of information, but a quick read and lots of facts. I recommend we send as is.

Talking to Katy's caller....he's just wound up that we aren't doing enough to regulate it. Its in registration review now, and things may change based on what they find. Don't know yet.

I added a few bits about Europe at the bottom. I remembered the Moms Across America study of glyphosate in urine of women and children, so I checked into that a bit, too; added a few bullets under the Toxicity section.
